

***Board Governance Policy Development,  
Implementation, and Review***

---

The primary role of the Board is the development, amendment, and monitoring of Board Governance Policies.

Board Governance Policies will be reviewed on an annual basis to ensure that they are compliant with federal and provincial requirements, consistent with community values, and meet the educational needs of all students.

Input and recommendations for consideration of governance policy development or amendment may come to the Board through the monitoring process, the Superintendent/CEO, any Board committee, Trustees, division personnel, or from the public.
